

Diamante

Jacopo Foggini

General description:

Tables for sofas and armchairs or coffee tables, large size, made of strands of super clear transparent polycarbonate, green glass effect, "woven" by hand.

The name Diamante, dedicated to the friend Diamante D'Alessio, perfectly sums up the quality of this very pure material which sparkles like a parcel of diamonds.

Technical description:

The tables, made by hand with a unique top each time, are about 80 centimetres in size with three different heights. They can be grouped together to create larger or smaller islands.

The conical metal base is available in three finishings: gold, palladium and ruthenium.
