

Standalto

Francesco Binfaré

General description:

Fluffy. Soft. Elegant.

Suspended from the ground and fully adaptable to the user's wishes.

Standalto's structure retains the fundamental element of the "Smart Cushion". The backrests and armrests can be shaped as desired, while sitting comfortably, with a simple, light pressure.

The high level of softness offers maximum comfort.

Use:

The comfort offered by the sofa is ensured by the width of the backrests, armrests and seats.

The stuffing, made of feathers and Gellyfoam®, gives the cushions extraordinary softness.

The variety of shapes and the depth of the seats give the possibility to create different compositions: linear, pure-corner, open-corner or free plan solutions. Seats with open elements can be deeper and offer informal comfort and a freer use of the sofa, which can be enjoyed alone or in company.

Technical description:

Steel structure and mechanisms. Base-tray made of poplar plywood. Stuffing in polyurethane foam, Gellyfoam®, synthetic wadding and goose down. Chromed steel feet.
